

THE LEADERS IN POLYCARBONATE SHEET AND GLAZING SYSTEMS

- Policarb® and arcoPlus® lines of structural multiwall polycarbonate sheets are offered in a variety of widths, lengths, thicknesses, profile structures, colors and glazing options to satisfy all of your building and industrial needs

Increasing your profits with high performance plastics, technical expertise and marketing know how

Established in 1973, CartierWilson provides thermoformers, fabricators and distributors of plastic products with a broad variety of top-performance, competitively priced materials produced by world-leading manufacturers. In addition, CartierWilson provides expert advice in applying these materials in ways that improve the performance of your products while reducing your material costs and processing times.

With in-depth knowledge of all aspects of your business, CartierWilson can also assist you in marketing of your services, and help you expand your capabilities to take advantage of today's fast-growing markets such as thermoformed aircraft interior components, medical equipment and building products.

In addition to representing the world's leading manufacturers of plastics and related products, CartierWilson offers a comprehensive range of services to ensure your total success and increase your profits - from expert assistance in specifying your plastic and related materials to marketing of your finished goods for the highest possible profit, and everything in between - all at no additional cost or obligation.
