- ABS, Acrylic, PC/ABS blend and TPO for industrial applications including agriculture, heavy equipment, signage, recreational vehicles, medical and marine components
- Option of mono, co-extrusion, or tri-layered construction in both sheet or roll stock

## SERVICES WE PROVIDE

- Education & Training of Distribution Sales Force
- Distribution of Sales & Marketing Materials
- Specification Selling
- Trade Shows
- New Product Development
- Thermoforming, Fabricating & Machining Guidance
- Government Contracts
- Marketing Research & Competitive Analysis
- Joint Calls
- Field Sales & Marketing
- Lead Generation
- Market Development

## Increasing your profits with high performance plastics, technical expertise and marketing know how

Established in 1973, CartierWilson provides thermoformers, fabricators and distributors of plastic products with a broad variety of top-performance, competitively priced materials produced by world-leading manufacturers. In addition, CartierWilson provides expert advice in applying these materials in ways that improve the performance of your products while reducing your material costs and processing times.

With in-depth knowledge of all aspects of your business, CartierWilson can also assist you in marketing of your services, and help you expand your capabilities to take advantage of today's fast-growing markets such as thermoformed aircraft interior components, medical equipment and building products.

In addition to representing the world's leading manufacturers of plastics and related products, CartierWilson offers a comprehensive range of services to ensure your total success and increase your profits - from expert assistance in specifying your plastic and related materials to marketing of your finished goods for the highest possible profit, and everything in between - all at no additional cost or obligation.
